

What can IAC do?

CLARIS™

- Data and Messages
 - Information exchange
 - Messages for Control
- Interchangeable Component Revolution
 - Similar to RCA jack
- Simplify complex tasks
 - Use of multiple apps. can provide complete solutions for problems involving multiple tasks.

New types of Apps

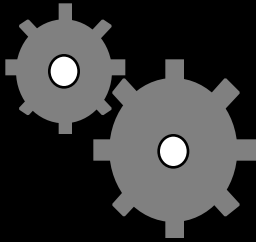

CLARIS™

- Smaller/Task Focused
 - Each can have necessary depth in a given task. Users won't need to compromise depth for breadth of functionality.
- Ends feature creep
 - Applications don't need to grow by adding every possible new feature.
- Engine/Interface Separation
 - Data, Graphics, Sound, Video

New Capabilities

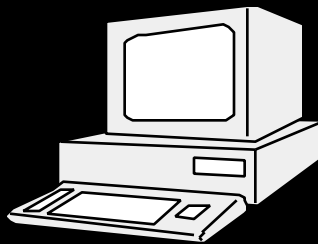

CLARIS™

- Scripted Multi-task solutions
 - Many computing needs are multi-step
- Integration Gains
 - Using the best of capabilities of each app.
- Automate repetition
 - Playback capabilities will allow more programmable applications.

Barriers to Progress

CLARIS™

- Standard Protocol
- Standard Language
- Standard Data types
- User Interface

What Claris will do
