- We want to enrich interchange capabilities
- Richer data shared through IAC, AppleEvents
- Which problems are we trying to solve?
 - Defining the container - **YES**
 - Defining the contents - **For common types**

Making It Easier

Goals today...

- We want to enrich interchange capabilities
- Richer data shared through IAC, AppleEvents
- Which problems are we trying to solve?
 - Defining the container - **YES**
 - Defining the contents - **For common types**
 - Hypergalactic interchange

Making It Easier

Goals today...

- We want to enrich interchange capabilities
- Richer data shared through IAC, AppleEvents
- Which problems are we trying to solve?
 - Defining the container - **YES**
 - Defining the contents - **For common types**
 - Hypergalactic interchange - **Not today**

Making It Easier

Goals today...

- We want to enrich interchange capabilities
- Richer data shared through IAC, AppleEvents
- Which problems are we trying to solve?
 - Defining the container - YES
 - Defining the contents - For common types
 - Hypergalactic interchange - Not today
- Applications adopt standard resource types

Making It Easier

How?

- The Resource Manager

Making It Easier

How?

- The Resource Manager
- Definition of new resource types

Making It Easier

How?

- The Resource Manager
- Definition of new resource types
- Define common types with input from **YOU**:

Making It Easier

How?

- The Resource Manager
- Definition of new resource types
- Define common types with input from **YOU**:
 - Types that you want to see defined

Making It Easier

How?

- The Resource Manager
- Definition of new resource types
- Define common types with input from **YOU**:
 - Types that you want to see defined
 - What data you want in those types

Making It Easier

How?

- The Resource Manager
- Definition of new resource types
- Define common types with input from **YOU**:
 - Types that you want to see defined
 - What data you want in those types
 - Types you would support in applications

Making It Easier

How?

- Register types through MacDTS

Making It Easier

How?

- Register types through MacDTS
- Publish and document types regularly

Making It Easier

How?

- Register types through MacDTS
- Publish and document types regularly
- Standardize on a common set

Making It Easier

How?

- Register types through MacDTS
- Publish and document types regularly
- Standardize on a common set
- AppleLink your suggestions to:
 - File Format Feedback
 - “**FF.FEEDBACK**”

Making It Easier

How about some ideas...

- We would like to see specific input on:
 - Application needs for formatted text
 - Additional graphics you need to support
 - Alternate media types
 - Others...

The power to be your best
